

In the event you are unable to fit your podz through your front doorway please be advised to follow these simple instructions to split the PetzPodz into 2 pieces.

We recommend 2 people manage the following:

Keeping the canopy closed on the pod, use a 13mm socket to undo one of the nuts on the rear spine whilst holding firm the other nut to avoid rotation and carefully pull out the steel rod. Undo the side 'clever clips' holding the canopy down and simply lift off from the base.
